(RI)SCOPERTA
DELLA SINDROME
DI CUSHING

seconda edizione

Capri \ 15-18 maggio 2013
Certosa di San Giacomo
Hotel della Piccola Marina

SESSIONE 2: IL CUSHING ECTOPICO

moderatori Ettore Degli Uberti, Diego Ferone

L'INQUADRAMENTO CLINICO-DIAGNOSTICO
Giovanni Vitale

L'APPROCCIO TERAPEUTICO
Manuela Albertelli

IL RUOLO DEGLI ANALOGHI
DELLA SOMATOSTATINA E DEL PASIREOTIDE
Giorgio Arnaldi

Treatment of Adrenocorticotropin-Dependent Cushing's Syndrome: A Consensus Statement

Part V: Management of Ectopic ACTH Syndrome, Nelson's Syndrome, Special Patient Populations, and the Patient after Successful Surgical Treatment

Tumor-directed therapy involves a multidisciplinary, individualized approach and can include **somatostatin analogs**, systemic chemotherapy, interferon-, chemoembolization, radiofrequency ablation, and radiation therapy.

EXTENSIVE CLINICAL EXPERIENCE

Cushing's Syndrome Due to Ectopic Corticotropin Secretion: Twenty Years' Experience at the National Institutes of Health

J Clin Endocrinol Metab 90: 4955–4962, 2005)

Ioannis Ilias, David J. Torpy, Karel Pacak, Nancy Mullen, Robert A. Wesley, and Lynnette K. Nieman

**Studiati
90 pazienti**

**Trattati con SSA
0**

The Ectopic Adrenocorticotropin Syndrome: Clinical Features, Diagnosis, Management, and Long-Term Follow-Up

J Clin Endocrinol Metab 91: 371–377, 2006)

Andrea M. Isidori, Gregory A. Kaltsas, Carlotta Pozza, Vanni Frajese, John Newell-Price, Rodney H. Reznek, Paul J. Jenkins, John P. Monson, Ashley B. Grossman, and G. Michael Besser

**Studiati
40 pazienti**

**Trattati con SSA

Ectopic ACTH-secreting Tumors Treated with Octreotide

Primary tumor	n°	Initial Response	Prolonged Response
Small Cell Lung Ca.	3	2/3	
Bronchial Carcinoid	11	8/11	3/4
Thymus Ca. / Carcinoid	3	1/3	
Functional Pancreas NET	9	8/9	4/5
Medullary Thyroid Carcinoma	2	2/2	
Gastro-intestinal Carcinoid	3	0/3	1/1
Occult Tumor	6	4/6	3/5
TOTAL	37	25/37	11/15

da De Herder, et al., Metabolism 1996

Octreotide Treatment of ACTH-secreting Metastatic Gastrinoma

Lamberts, et al., J. Clin. Endocrinol. Metab. 1988; 67: 1080-83.

Ruolo degli analoghi della somatostatina nella secrezione ectopica di ACTH

- Riduzione o normalizzazione della ipersecrezione di ACTH e quindi di cortisolo
 - Concomitante riduzione di altre secrezioni ormonali associate
 - Effetto antiproliferativo
-
- Ruolo nell'imaging
 - Veicolo per terapia radiorecettoriale

Comparison between hormonal response to acute octreotide administration and results of pentreotide scintigraphy in ACTH-secreting Bronchial Carcinoids

Case	Octreotide test (100 mcg sc) *	111In-pentetetreotide scintigraphy
1	No response	Positive
2	Response	Positive
3	Response	Negative
4	Response	Positive
5	No response	Negative
6	No response	Positive

* Response = decreases in plasma ACTH and cortisol greater than 30%

Loli et al, JCEM 2003

Is there a therapeutic role for octreotide in patients with ectopic Cushing's syndrome?

G.I. Uwaifo¹, C.A. Koch², B. Hirshberg³, C.C. Chen⁴, P. Hartzband⁵, L.K. Nieman² and K. Pacak²

	Parameter	Case 1	Case 2	Case 3				
1	Age (yr)	40	36	43				
2	Ethnicity	Caucasian	Caucasian	Caucasian				
3	Gender	Male	Male	Male				
4	Diagnosis	Medullary thyroid Carcinoma	Unknown	Small Cell Carcinoma				
5	Metastases	Present	Absent	Present				
6	Serum cortisol nmol/l (normal: <207 nmol/l)	1380-1518	1076.4	1628	Cortisol response to octreotide	Increase	Decrease	No effect
7	Plasma ACTH (pmol/l) (normal: 2-13 pmol/l)	39.6-46.2	18.7	46	Octreotide scan	Positive	Negative	Positive
8	24-h urine free cortisol (nmol/day) (normal: 66-298 nmol/day)	4416-12,420	2343	2967				
9	24-h urine 17-hydroxysteroid (mg/day) (normal: 8-26 mg/day)	221	34.8	81.6				
	Duration of symptoms before referral (yr)	1	3	0.4				

Table 3
Biochemical Response to Octreotide in Ectopic Corticotropin-Secreting Tumors

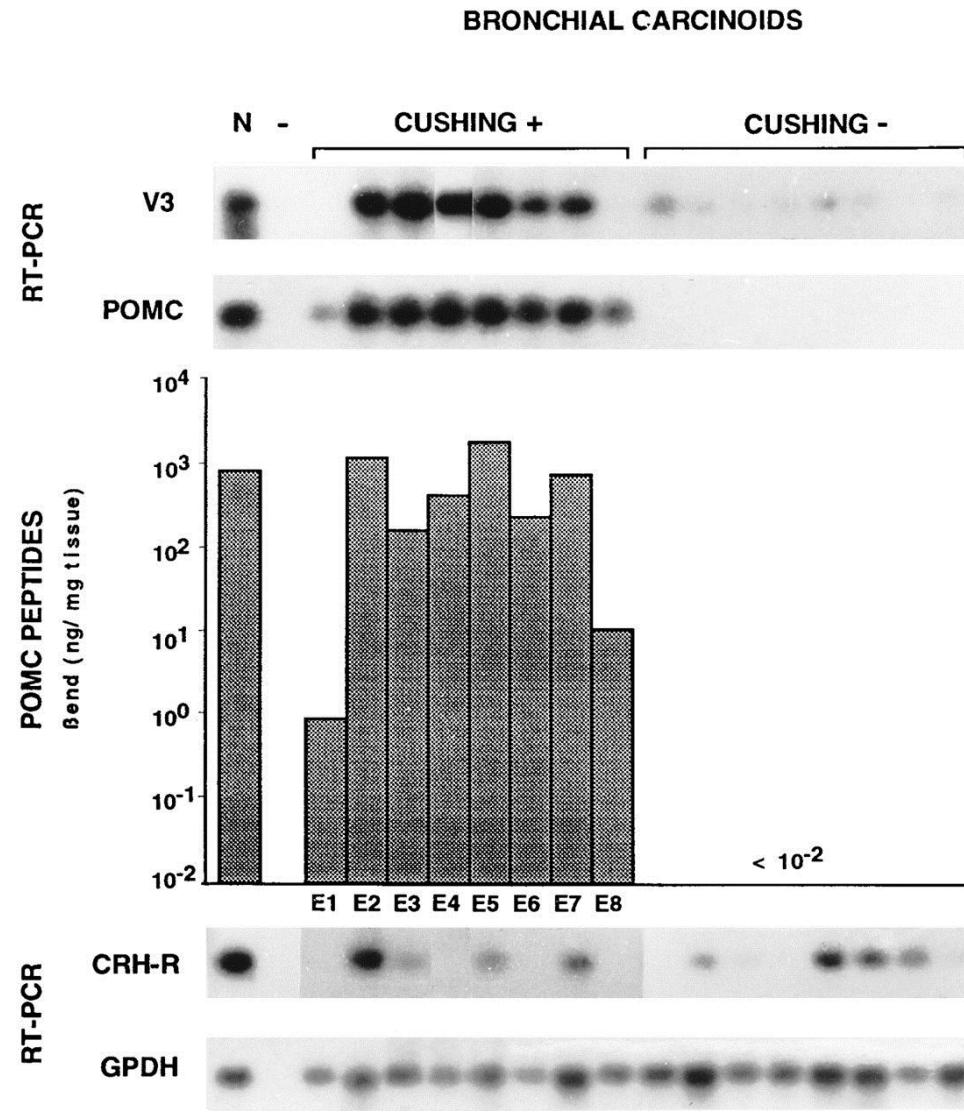

Reference	No. patients	Eucortisolism, No. of patients	Normal corticotropin, No. of patients	Treatment duration
Ruszniowski et al (14)	1	1	1	9 months
Woodhouse et al (15)	6	3	1 of 2	1 day to 1 year
De Rosa et al (16)	1	1	1	6 months
Van den Bruel et al (17)	1	1	1	8 years
Uwaifo et al (18)	3	1	1	1 day to 2 years
Cheung et al (19)	2	0	1	5 to 7 days

Ketoconazole + Octreotide in a 25-year-old Man with Cushing's Disease

Vignati & Loli, J. Clin. Endocrinol. Metab. 1996; 81: 2885-90. (PT 2)

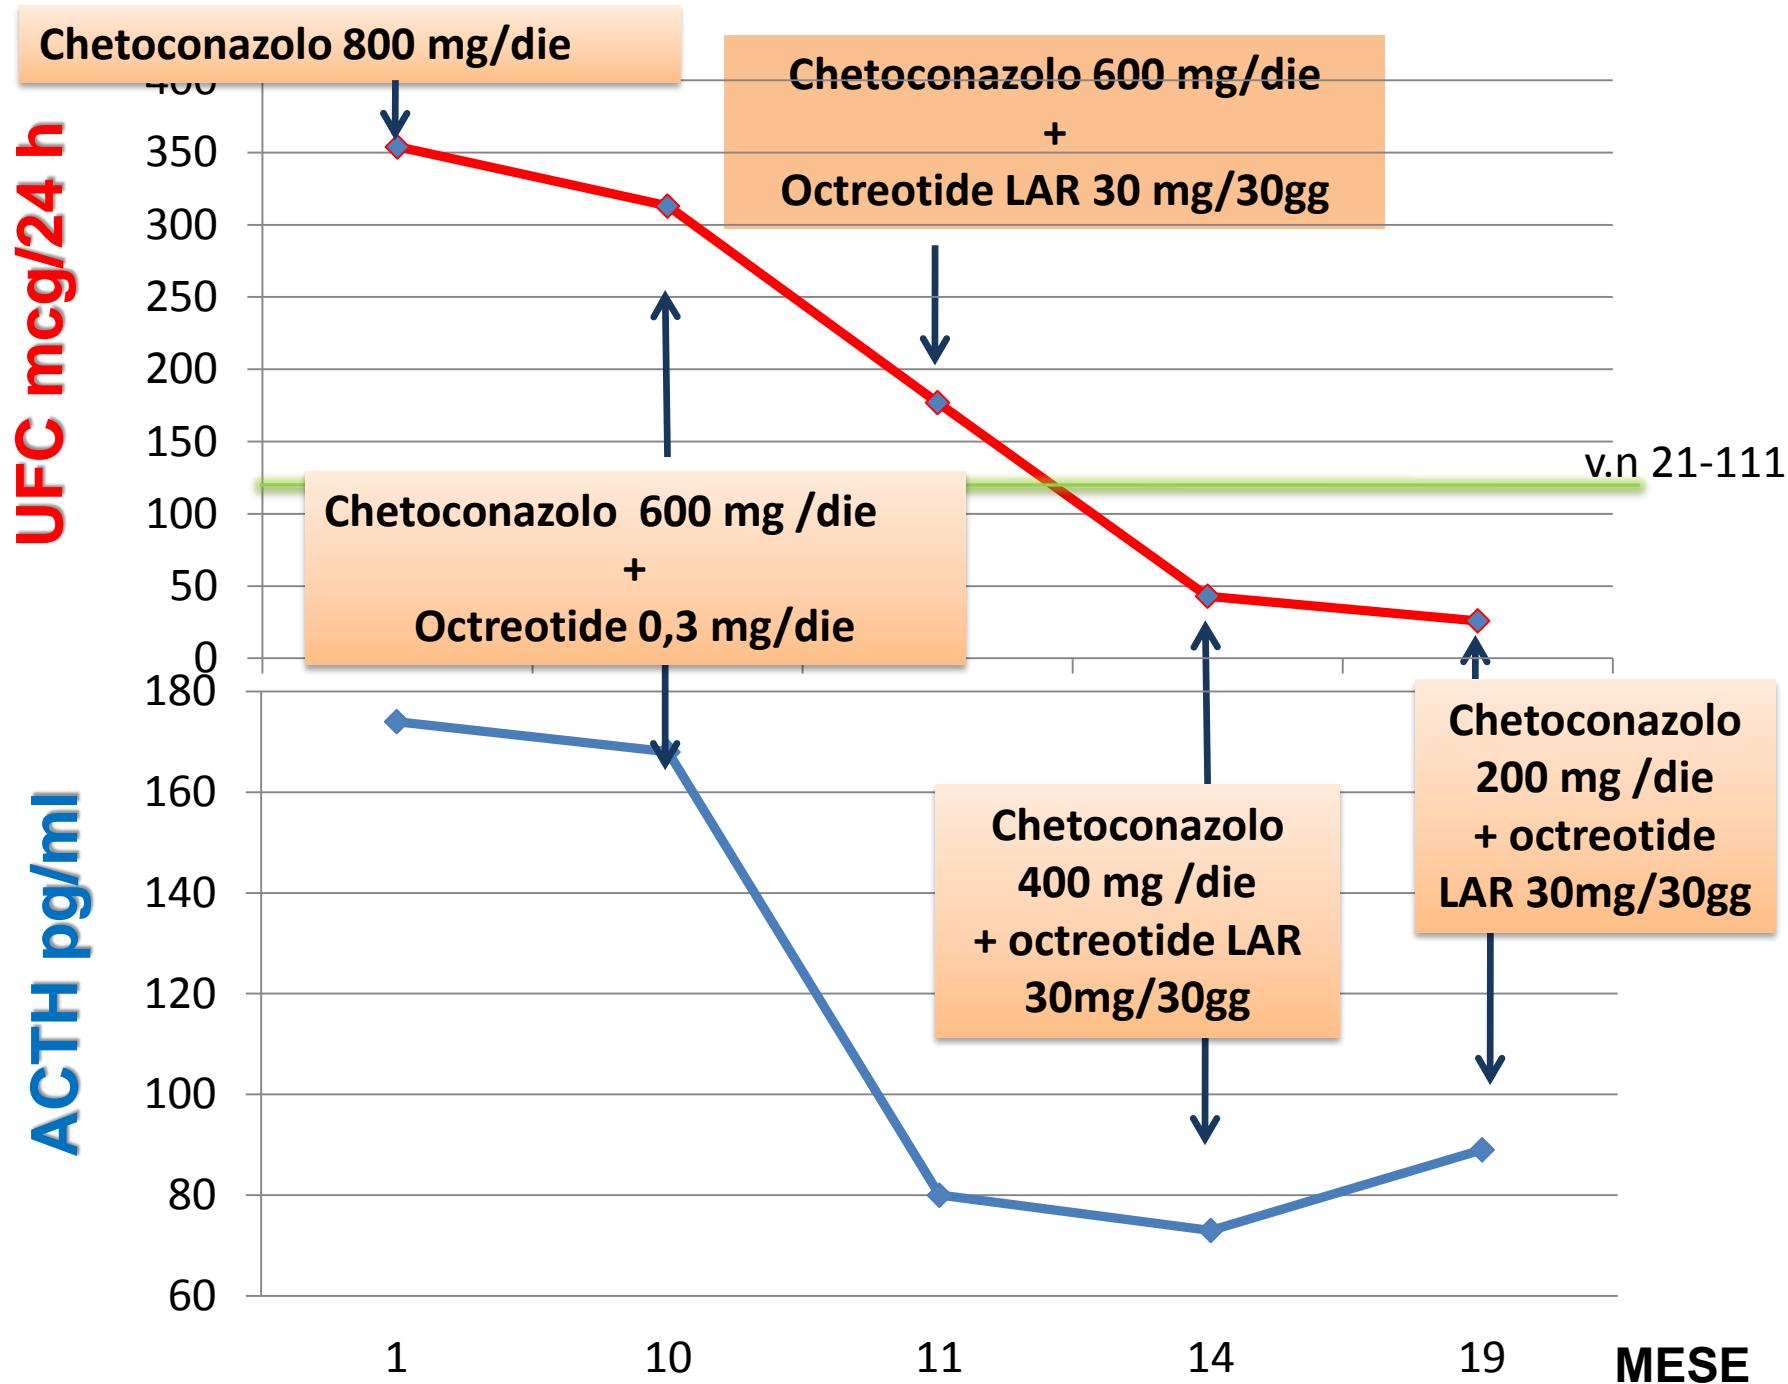

CASO CLINICO donna di 53 anni

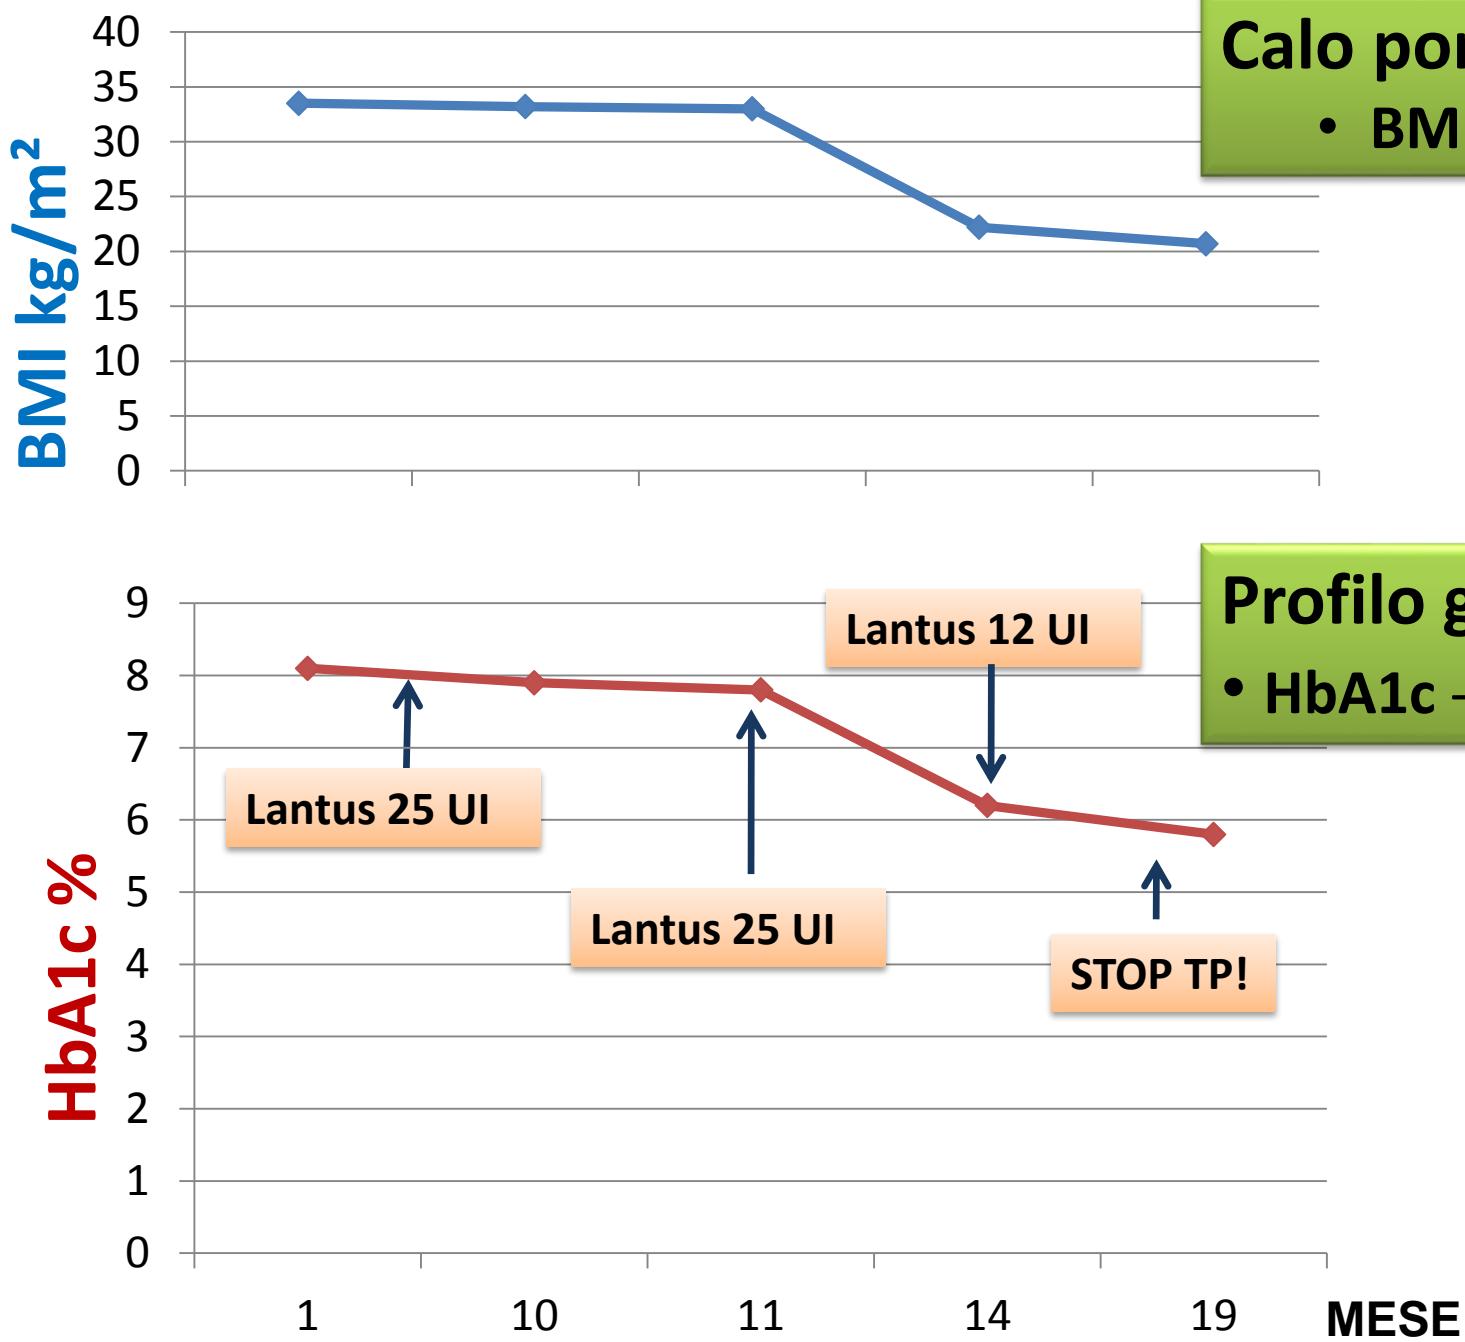

HISTORY

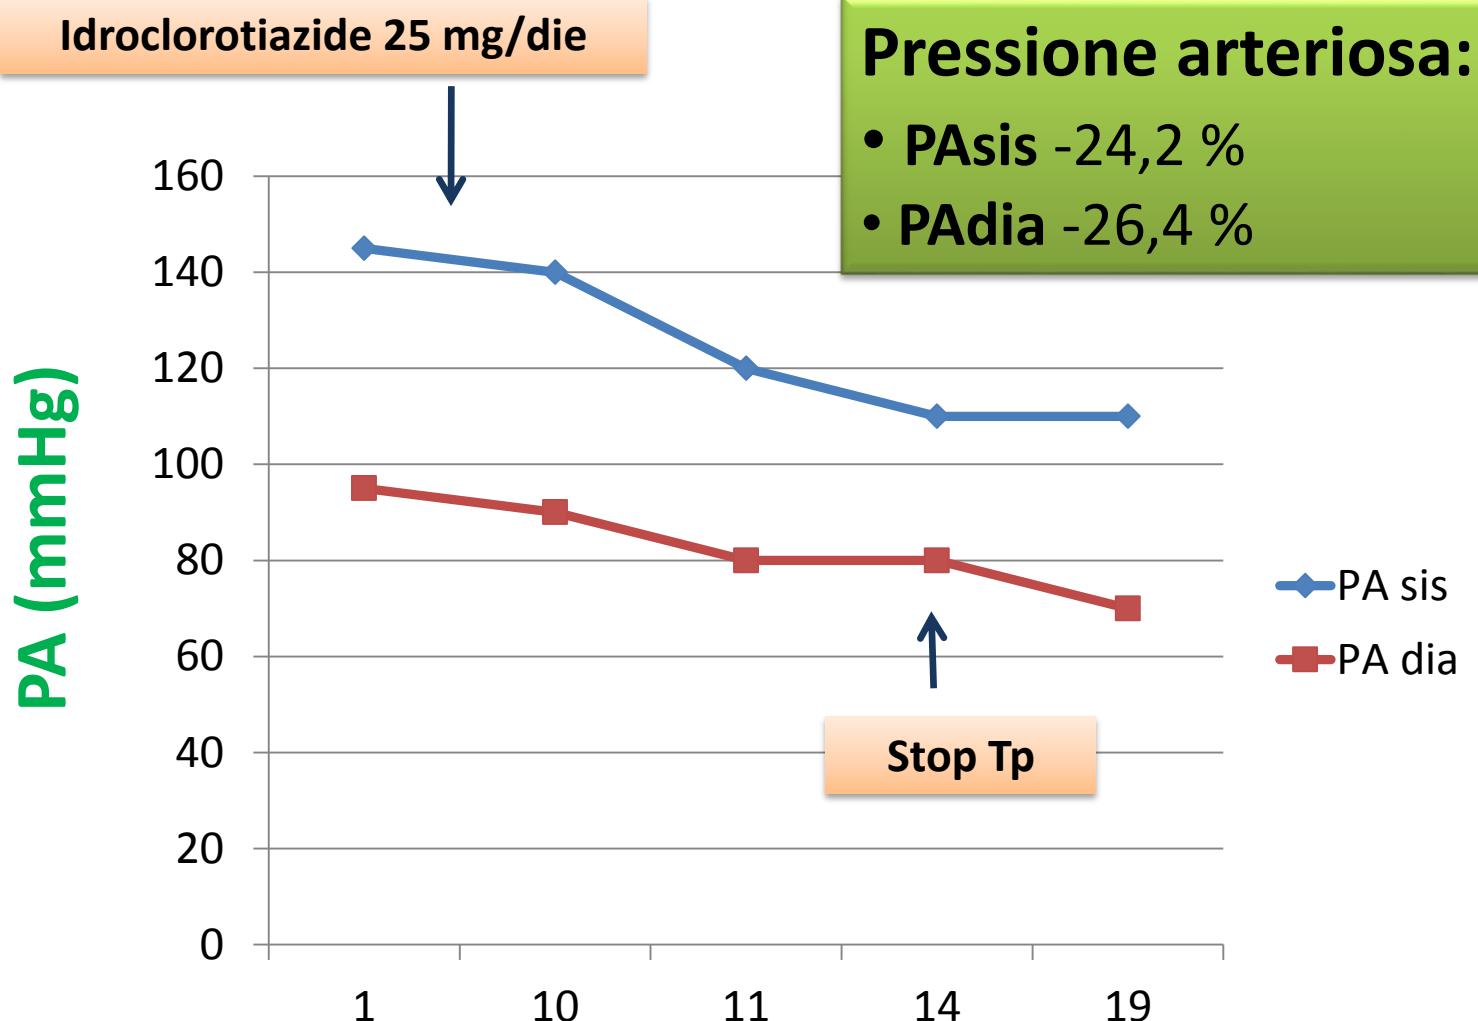

- 2008: ulcera gastrica perforata
frattura di L2 → osteoporosi
- 2009: ascessi epatici multipli
ipertensione arteriosa
diabete mellito
ipokaliemia

- ACTH 178 pg/ml
- CLU aumentato
- DEXA 1 mg → cortisolo 24 mcg/dl
- DEXA 8 mg → cortisolo soppresso
del 90%
- Assente risposta di ACTH e
cortisolo al CRH e al DDAVP
- RMN ipofisi negativa
- CATETERISMO negativo
- TAC total body negativa
- PET con FDG negativa
- Scintigrafia con Gallio-DOTANOC
negativa

**Somatostatin analogs in vitro effects in a growth
hormonereleasing hormone-secreting bronchial carcinoid.**

J Clin Endocrinol Metab 2005 April;90(4):2104-9.

- **sst5 specific analog BIM- 23206 the most inhibition (-75 %),**
- **sst2 specific analog BIM- 23120 (-55 %)**
- **Ianreotide (-30 %)**
- **sst1 specific analog BIM-23926 was less effective (-20 %).**

CASO CLINICO uomo di 55 anni

HISTORY

- 2003: obesità tronculare
ipertensione arteriosa
diabete mellito
osteoporosi severa
- 2006: diagnosi di Sindrome di Cushing (il pz non inizia alcun trattamento)
- 2013: Giunge alla nostra osservazione

GENNAIO 2013

- **ACTH** 136 pg/ml **cortisolo** 26,9 µg/dl
- **Ritmo del cortisolo** assente
- **UFC** aumentato (392 µg/dl)
- **Cortisolo salivare** 1,08 µg/dl
- **DEXA 1 mg** → cortisolo (14,1 µg/dl)
- **DEXA 8 mg** → cortisolo soppresso (5,6 µg/dl)
- **Test al CRH** assente risposta di ACTH e cortisolo
- **Test al DDAVP**
ACTH 92 → 603 → 499 → 402 pg/ml
cortisolo 27,4 → 39,8 → 51,5 → 53,8 µg/dl
- **RMN** ipofisi negativa

CUSHING DA SECREZIONE ECTOPICA DI ACTH

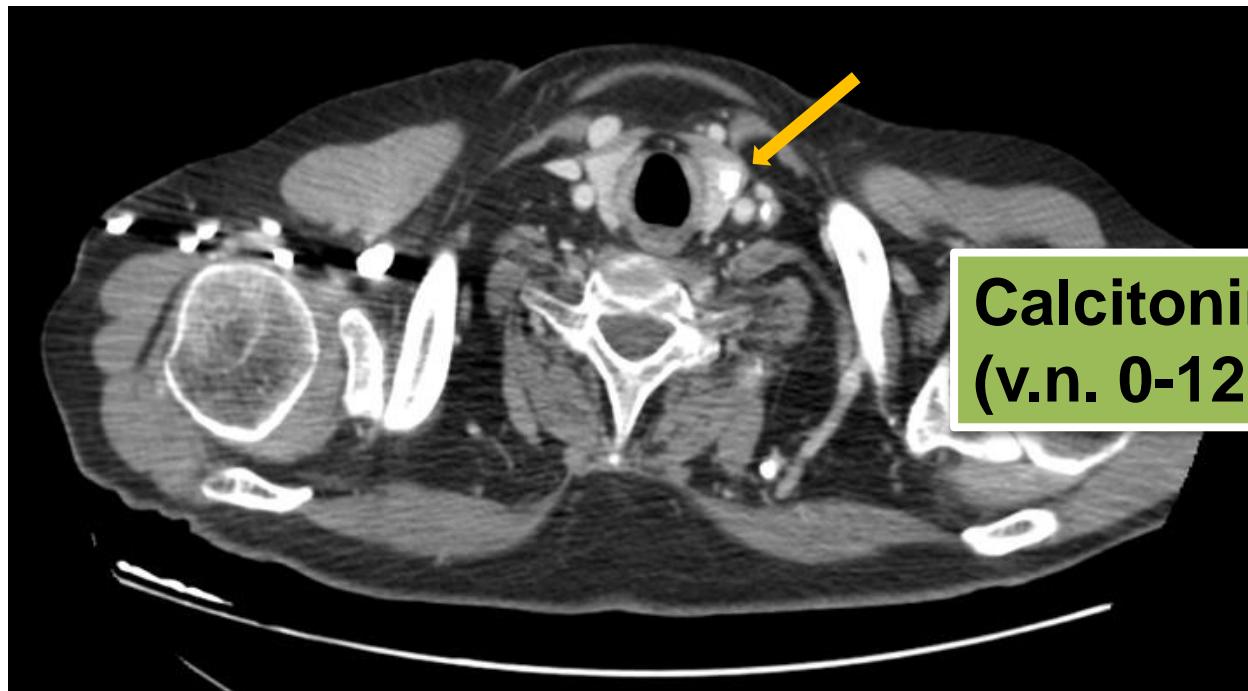

GENNAIO 2013

ECOGRAFIA DEL COLLO: nodulo calcifico sx di 1,1 x 1,4 cm e nodulo ipoecogeno laterocervicale sx di 0,8 cm (linfoadenopatia ?) (primo riscontro).

AGO ASPIRATO E ESAME CITOLOGICO su linfoadenopatia sx: linfociti e cellule epiteliali atipiche talora multinucleate, con citoplasma vacuolizzato, sospette per neoplasia di cui non si esclude l'origine tiroidea/paratiroidea

**Calcitonina 1557 pg/ml
(v.n. 0-12 pg/ml)**

MARZO 2013

TIROIDEKTOMIA TOTALE PIU LINFOADENECTOMIA LATEROCERVICALE E DEL COMPARTIMENTO CENTRALE

ISTOLOGICO: carcinoma della tiroide misto , midollare e papillifero con estesa metaplasia ossea. Metastasi linfonodali sostenute dalla componente midollare
Immunoistochimica positiva per ACTH

Immediato postoperatorio

CORTISOLO: 22 µg/dl

Cortisolo SALIVARE h8 – h23: 1,4 → 1,3 µg/dl

ACTH 75pg/ml **UFC** 210 µg/24h

CALCITONINA 789 pg/ml

MARZO 2013

TIROIDEKTOMIA TOTALE PIU LINFOADENECTOMIA LATEROCERVICALE E DEL COMPARTIMENTO CENTRALE

ISTOLOGICO: carcinoma della tiroide misto , midollare e papillifero con estesa metaplasia ossea. Metastasi linfonodali sostenute dalla componente midollare
Immunoistochimica positiva per ACTH

MAGGIO 2013

RITMO DEL CORTISOLO: $22,7 \rightarrow 23,7 \rightarrow 21,8 \mu\text{g/dl}$

SALIVARE: $1,5 \rightarrow 1,4 \rightarrow 1,3 \mu\text{g/dl}$

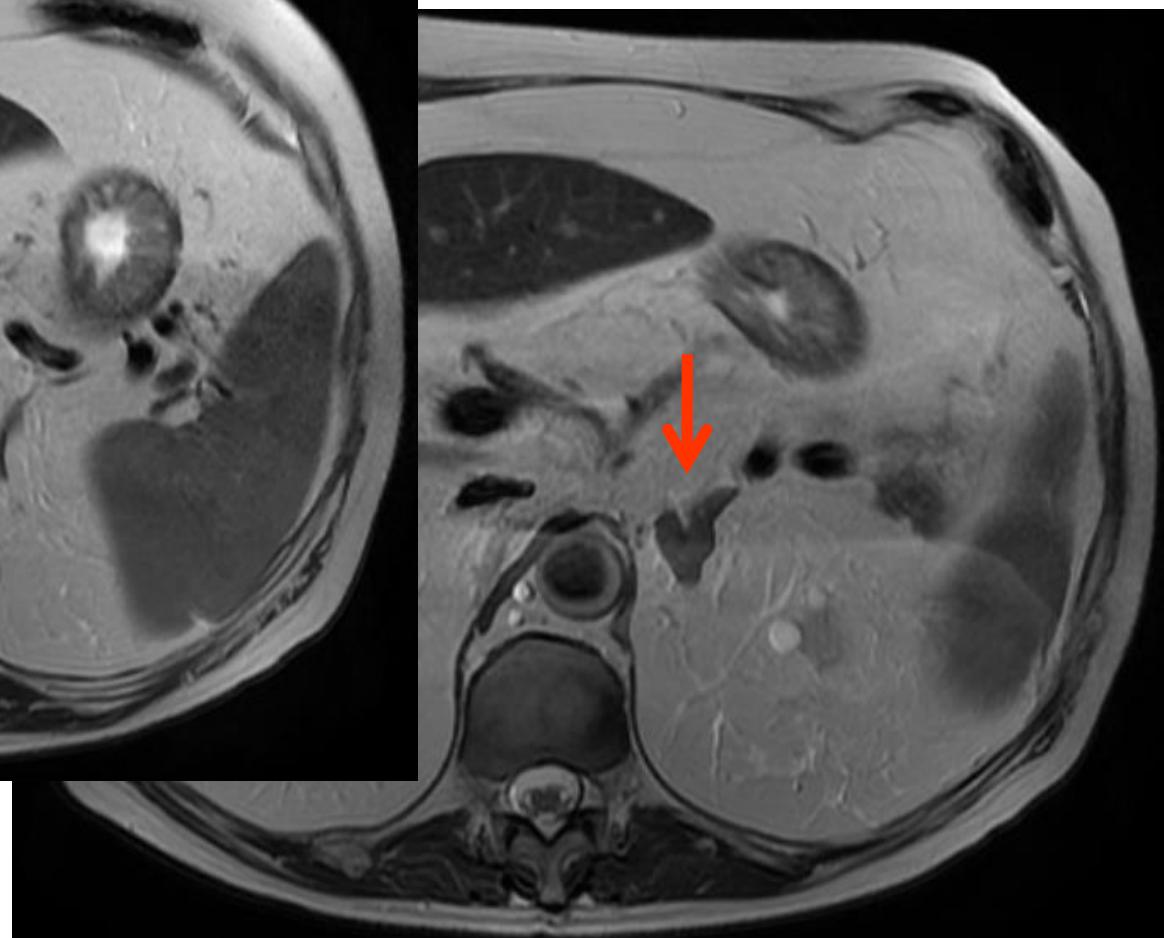

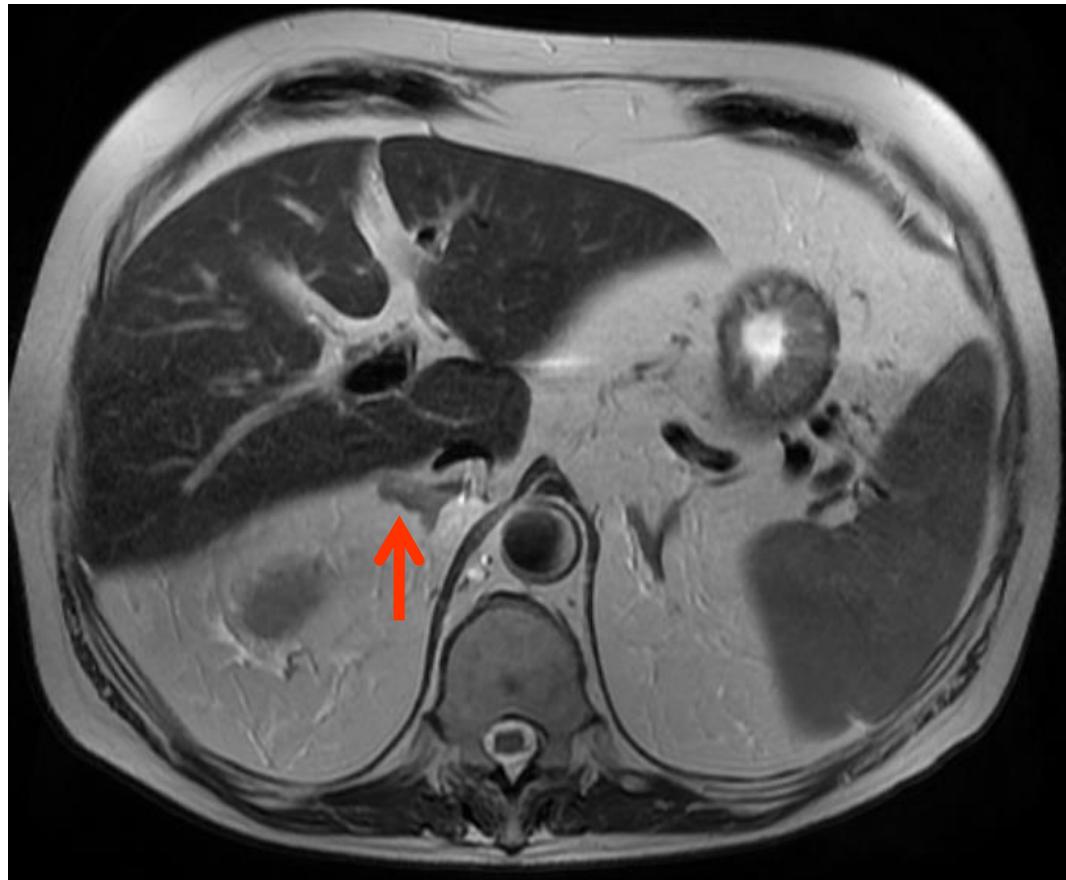

ACTH 84 pg/ml **UFC** 193 $\mu\text{g}/24\text{h}$

CALCITONINA 869 pg/ml

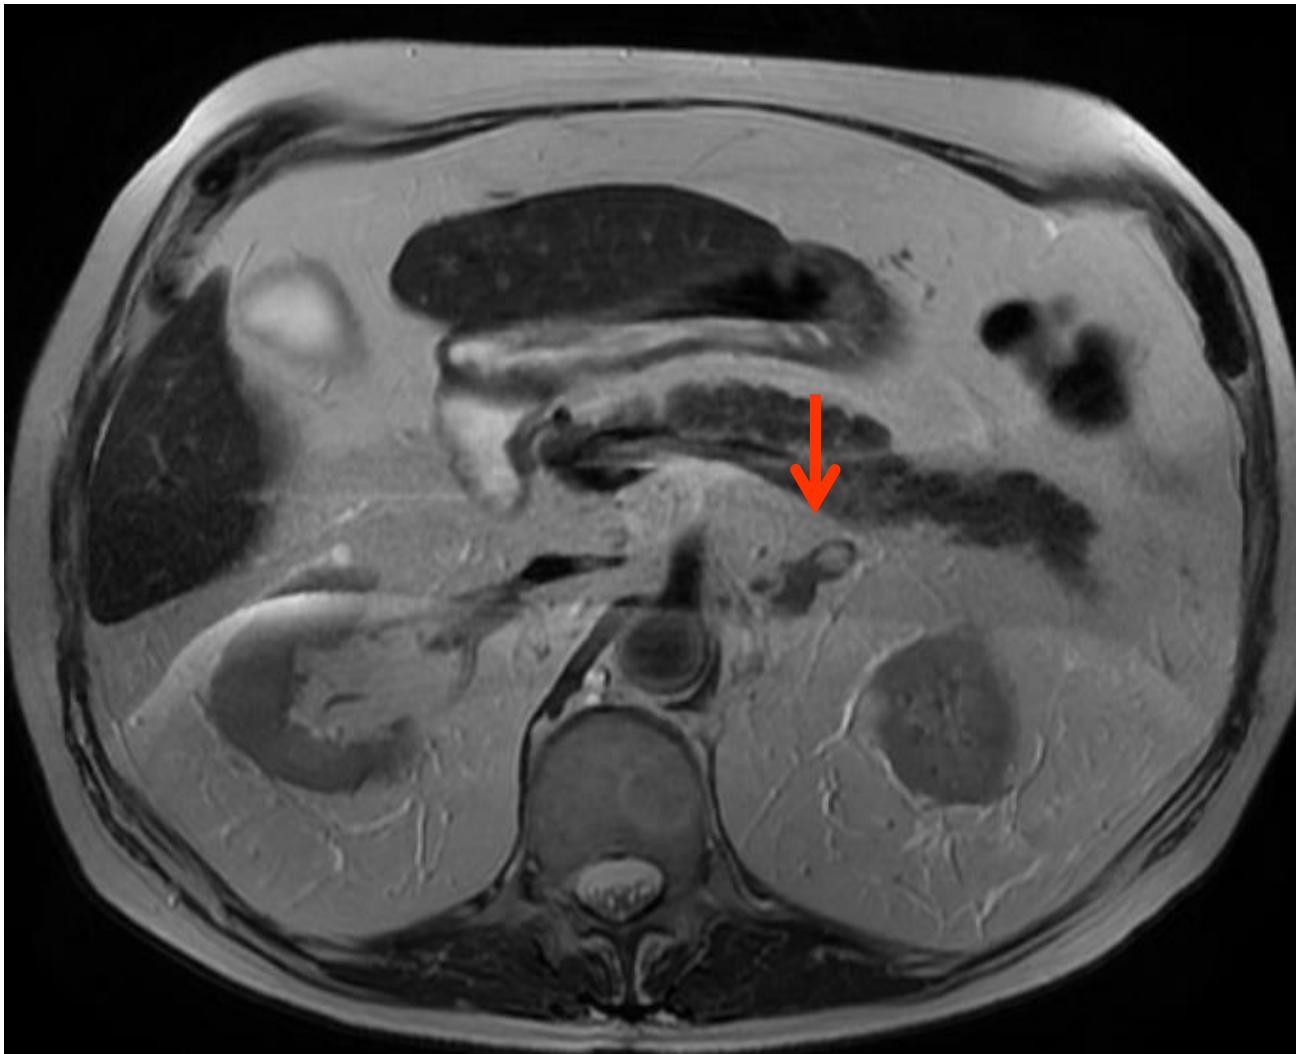

TIREOGLOBULINA 0,14 ng/ml

AC. ANTI- TIREOGLOBULINA negativi
